MeSH

MeSH (Medical Subject Headings) is the NLM controlled vocabulary thesaurus used for indexing articles.

THESAURUS MeSH

Che cos'è:

È un soggetto standardizzato all'interno del quale un concetto viene sempre ricondotto ad un unico termine, indipendentemente dalle varianti linguistiche che gli autori potrebbero utilizzare per rappresentarlo

Sinonimi o varianti terminologiche	Soggetto unico del Thesaurus
Sudden infant death Cot death SIDS	Sudden infant death

A che cosa serve:

Viene utilizzato dai catalogatori per attribuire i soggetti ai records bibliografici, in modo da rappresentare il contesto in modo univoco.

Consente un livello più alto di controllo dei termini che andranno a comporre la strategia di ricerca

CORRELAZIONE DEI TERMINI

Inserendo i termini di ricerca, il MeSH identifica subito i termini e suggerisce una tipologia di ricerca sicuramente migliore

RICERCA INIZIALE

The screenshot shows the MeSH search interface. At the top, the search bar contains 'BREAST CANCER'. Below the search bar, there are options for 'Create alert', 'Limits', and 'Advanced'. The search results are displayed in a list format, with the first two items highlighted in a red box. A red arrow points from the search bar to the first item in the list.

MeSH MeSH BREAST CANCER
